

Cross-Realm Intelligence Archive

Version 1.0

Introduction

The Cross-Realm Intelligence Archive was created after the unprecedented Convergence Event of 18 October 2042, during which three separate worlds became temporarily connected through unstable dimensional gateways. These worlds were identified as the Grand Line Realm, the Cursed Energy Realm, and the Demon Age Realm.

The purpose of this archive is to document notable individuals, organizations, locations, artifacts, and historical events observed during the seven-month convergence period.

All information contained within this document was collected by the Inter-Realm Observation Bureau (IROB).

Conclusion

The Convergence Event demonstrated that cooperation between the Grand Line Realm, the Cursed Energy Realm, and the Demon Age Realm was possible despite major cultural and technological differences.

The alliances formed between Monkey D. Luffy, Satoru Gojo, Tanjiro Kamado, Yuji Itadori, Megumi Fushiguro, Nico Robin, and numerous others prevented large-scale catastrophe and established the foundation for future inter-realm cooperation.

The archive remains one of the most important records of the convergence period and serves as the primary reference document for all future dimensional research initiatives.
